“End Use” Energy Audits according EN16247, ISO50001 & EE/27/2014 directive

- Power Analysis
- Thermal imaging
- Ultrasound diagnostic (pressure utilities, Freon, bearings, valves, electrical Arcs, mechanical distortions, lubrication)
- Steam, Compressed air & Refrigerator system networks inspections
- Weekly temperature profiles & thermal flow analysis in Buildings & Industries
- Energy Saving Potential in Lighting & HVAC
- NG, LPG & OIL Burner regulations
- Industrial Process & BEMS Optimization
- Motor list & Energy Saving potential analysis
- Mechanical & Electrical Efficiency Analysis
- Bioclimatic analysis
- Cogeneration & Renewable Opportunities
